

GRCA Public Health River Program - Evaluation Checklist

Date of Evaluation _____ Location of Evaluation _____

Outfitter _____

Trip Leader _____

Potable Water

- 1) Y N NA **Filtration** by "Absolute" 1 micron Filter or ANSI/NSF Standard #53 for cyst removal? [For sediment-laden water settle overnight or use alum @ 2 tsp per 5 gal water.]
- 2) Y N NA **Disinfection** [1 ppm Cl at time of disinfection? Let stand 30 min before consumption?]
- 3) Y N NA **Test Kit** used to check 1 ppm Cl requirement for water disinfection after filtration?
- 4) Y N NA **Hauled Water** [Approved Municipal System. Disinfect container with 2 TBLS bleach per 5 gal container, let stand 30 minutes, rinse with potable water, then fill?]
- 5) Y N NA **Boiled Water** [Rolling boil for 1 minute?]

Food Handlers

- 6) Y N **Sick Food Handlers** preparing food? [Guides with gastrointestinal illness restricted from food handling and water treatment for 72 hours after symptoms resolved.]
- 7) Y N **Food Handlers** with unprotected cuts or sores preparing food? [Not allowed.]
- 8) Y N **Food Handlers** eating while preparing meals? [Not allowed.]
- 9) Y N **Guests** preparing or handling food other than their own? [Not allowed.]
- 10) Y N **Bare Hand** contact with ready-to-eat foods? [Strongly encouraged to use gloves.]

Food Storage, Prep, Service

- 11) Y N **Raw Potentially Hazardous Foods (PHF)*** stored properly? [Whenever possible, raw PHF should be stored in a separate cooler. When this is not possible (e.g. single cooler trips), raw potentially hazardous foods must be stored at the bottom of the cooler in durable leak-proof containers. Double bagging is not adequate when storing raw potentially hazardous foods in the same cooler as ready to eat foods.]
- 12) Y N **PHF** Stored at or below 45 degrees F?
- 13) Y N **All food stored separately** from cleaners, fuel, human waste or solid waste receptacles?
- 14) Y N **Raw PHF** contact surfaces sanitized before use with other foods? [Utensils, cutting boards, containers, etc].
- 15) Y N **Thermometers** used to check internal cooking temperatures of raw animal foods? [165F for most PHF. Good idea to use 165F as a general rule. However, Food Code allows for eggs to be cooked @145F, steaks @ 145F, and ground meat@155F.]
- 16) Y N **Separate Utensils or Gloves** used by servers for each food item? [Best practice to have a food handler place food on guests plates as they walk by rather than have guests touch each utensil in succession. Especially if anyone ill on trip.]
- 17) Y N **Food protected** from environmental contaminants? [Overhead/side protection as needed]
- 18) Y N **Cooked PHF consumed or discarded within 4 hours?** [PHF not allowed to be prepared in advance in the backcountry and then cooled down for service at later meals.]

* (PHF) Include: 1-Raw or cooked meat, fish, shellfish, poultry, eggs, and dairy products. 2-Cooked (but the raw form is not PHF) rice, beans, or vegetables. 3-Raw sprouts. 4-Cut melons.

Washing and Sanitizing

- 19) YN **3-compartment dish washing setup** adequate? [*In the order of Wash-Rinse-Sanitize. Wash water with detergent and hot. Sanitizer at 100 ppm Cl residual*]
- 20) YN Are Test Strips used to check **Sanitizer compartment** chlorine residual levels?
- 21) YN Are dishes and utensils **air dried**?
- 22) YN Are tables and other **non-food contact surfaces** sanitized between uses? [*100 ppm Cl*]

Handwashing Setups and Handwashing practice

- 23) YN **Handwashing Setups** adequate? [*100 ppm Cl residual in source water. Test strips should be used to check Cl levels. Liquid soap shall be provided and used. Repeated dipping of hands in source water is not allowed. Air drying hands ok for non-food handlers.*]
- 24) YN **Handwashing Setups** conveniently located **near food prep** area?
- 25) YN **Handwashing Setups** conveniently located **near toilet areas**?
- 26) YN **Food handlers washing hands** as required? [*Wash hands immediately before food preparation, after using toilet, after touching hair or clothing, after other potential contamination. Food handlers use clean paper towels for drying hands.*]
- 27) YN **Guests** regularly encouraged to wash hands? [*After toilet and before getting food service.*]
- 28) YN **Alternative handwashing setups** used *only* when absolutely necessary? [*In extreme circumstances where sufficient treated water is not available, 62% ethyl alcohol sanitizer may be used after washing hands with untreated water.*]
